robustness during
challenging
economic times

“ We understand that booking a short term break or long term stay in a care home is daunting at any time. Families often have lots of questions and can understandably feel anxious.

Our experienced care teams are here to help you with the transition and put your mind at rest.

During the Covid-19 pandemic there are lots of new processes we all have to adhere to, but our aim is to still welcome you or your loved one into our home as seamlessly and comfortably as possible. At all times we strive to enrich the lives of those we care for, their families and our staff. ”

S.A. Clarke-Kuehn

Sarah Clarke-Kuehn
Group Director - Care

New residents can either self-isolate in their own home before coming to the care home, or join us and then self-isolate*

* New residents can choose to self-isolate in the comfort of their own home for 11 days, they will then join us in the care home where we will test them for Covid-19 and support them to self-isolate for 3 more days until the result of the test is known. Alternatively, new residents can come to the care home immediately where we will support them to self-isolate in their bedroom for a period of 14 days.
